FUNDAMENTAL RESEARCH DISCLOSURE

In order to eliminate the requirement for prior approval of public disclosure of information (in accordance with DFARS 252.204-7000) under this award, the proposing firm shall identify and describe all fundamental research to be performed, including subcontracted work, with sufficient specificity to demonstrate that the work qualifies as fundamental research.

Fundamental research means basic and applied research in science and engineering, the results of which ordinarily are published and shared broadly within the scientific community, as distinguished from proprietary research and from industrial development, design, production, and product utilization, the results of which ordinarily are restricted for proprietary or national security reasons.

Any proposed fundamental research shall be listed in separate task(s) in order to clearly delineate these efforts from other proposed efforts which are not proposed as fundamental research.

Simply identifying fundamental research in this Disclosure does NOT constitute acceptance of the exclusion. All exclusions will be reviewed and, if approved by the government Contracting Officer, noted in the contract.

Techman Studios

5(b). Fundamental Research and Justification 1

Proposed Technical Volume Task Numbers: Task 1 through Task 7 (Base Period), and Task 8 through Task 10 (Option Period).

Description and Justification:

- **Objective:** Demonstrate the mathematical and software feasibility of using a shared contextual state-space for multi-agent event fusion and explanation.
- **Scope of Work:** The Phase I scope consists entirely of unclassified software simulations, synthetic scenario generation, and baseline comparisons. It does not involve real-world mission data, classified systems, or operational targeting.
- **Justification:** The research is basic and applied scientific inquiry conducted at private facilities, intended for eventual dissemination in scientific publications and academic reviews. It does not contain proprietary military secrets or ITAR-controlled operational parameters.
